

Dear Members of Congress,

We, the undersigned organizations and advocates, write to express our deep concern about the life-threatening and ongoing barriers millions of Americans face in accessing affordable insulin. We urge Congress to act decisively to save lives by addressing the outrageous costs of insulin and the systemic abuses that sustain these costs.

Insulin was first used to treat diabetes in 1922, with the original patent sold for \$1 to ensure its accessibility for all. Insulin is often sold for over \$300 per vial, despite it costing only a few dollars to manufacture, leaving many patients unable to afford the multiple vials they need each month. This exploitation is not just a crisis of affordability; it is a crisis of survival. One in four people who rely on insulin are forced to ration due to its exorbitant price.

Despite much news to the contrary, the price of insulin is not capped. Capping insulin out-of-pocket expenses leads to declines in out-of-pocket spending, increased adherence, and lower complications. Existing Medicare \$35 insulin out-of-pocket expenses policies still leave 150,000 Medicare beneficiaries paying more than \$35 per insulin prescription. Insulin prices need to be addressed writ large, but capping insulin out-of-pocket expenses are a way to save lives in the meantime.

A virtual monopoly by three insulin manufacturers has been sustained for decades through patent evergreening. Patent evergreening allows companies to extend monopolies by making minor modifications to existing products, preventing generics and biosimilars from entering the market and keeping prices high.

As part of this, manufacturers force patients to switch to newer, more expensive versions of their products. This practice —product hopping — disrupts patient care, limits competition, and further inflates costs, creating additional financial and health burdens for individuals living with diabetes.

Pay-for-delay arrangements, killer acquisitions, and other anti-competitive tactics further restrict competition by incentivizing generic manufacturers to delay bringing lower-cost alternatives to market. These abuses exploit legal loopholes to maintain monopolistic control, forcing patients to endure skyrocketing costs for essential medications.

The consequences of these practices are dire: preventable hospitalizations, severe complications, and unnecessary deaths—all of which come at an enormous economic cost. For families, employers, and the healthcare system, the cost of inaction far exceeds the cost of reform.

That’s why we’re calling on Congress to act. We call on you to sign onto the below letter and enact insulin cost-cutting measures and address patent abuses by the July 2025 recess to ensure implementation by World Diabetes Day on November 14, 2025.

We stand ready to work with you to advance these reforms and ensure that insulin becomes affordable and accessible for everyone who needs it. The lives of over seven million people living in this country who rely on insulin to survive depend on your leadership

Signed,

***Congressional Letter for Members of Congress***

***Please sign on by February 13 2025 by emailing [usachapters@t1international.com](mailto:usachapters@t1international.com)***

*To be sent: February 14, 2025*

*Dear Congressional Leaders, Committee Chairs, and Ranking Members,*

*We write to urge immediate action to address the insulin affordability and availability and access crisis that endangers the lives of millions of Americans. With over seven million people in the United States relying on injected insulin to stay alive, this issue demands your urgent attention.*

*The crisis is stark: One in four Americans who rely on insulin to survive, ration it due to cost, often with significant health consequences.*

*This is a failure of competition and a failure of regulation. Insulin manufacturers use tactics such as patent evergreening, product hopping, and pay-for-delay to prevent lower-cost biosimilars and generics from entering the market. These monopolistic practices have kept prices high and patients in peril. Meanwhile, enforcement actions remain insufficient.*

*By July recess, we need Congress to take decisive action to draft and pass comprehensive legislation that can be implemented by World Diabetes Day on November 14 to:*

- 1. Establish national caps on all insulin out-of-pocket expenses to alleviate immediate financial burdens for patients, including for the uninsured, while recognizing that capping insulin out-of-pocket expenses do not address the underlying problem of inflated list prices.*
- 2. Implement reforms to curb patent abuses, including evergreening, product hopping, and other anti-competitive practices that stifle biosimilar competition and maintain monopolies.*

*Failure to act is not an option. The health and financial costs of inaction—preventable hospitalizations, diabetes-related complications, and premature deaths—are borne not only by individuals but by our entire healthcare system and economy.*

*We call on you to use your leadership to advance these reforms and ensure that no American is forced to ration or forgo the insulin they need to live.*

*Sincerely,*

*TBD MEMBERS OF CONGRESS*
